Ventilation measures are required in rooms without sufficient a exchange (e.g. closed rooms), because the occupational exposure limit values (see chapter & could be exceeded. This must be avoided. Wear suitable personal protective equipment (see section 8). Avoi contact with eyes, skin and clothing. Change contaminated of damaged gloves and contaminated clothing immediately and was skin immediately. Mix slowly, partially covering the mixin container. Pour carefully and slowly when repotting. Observe th BGBau technical data sheet and practical guide for handling epox resins.
Information about protection against explosions and fires:	Ensure sufficient air exchange and/or extraction in the workin areas. Take precautionary measures to avoid electrostate discharges.
