SECTION 4: First aid measures

General information	Remove soiled, soaked clothing immediately.
After inhalation	Remove person to fresh air, keep warm, allow to rest; if breathing is difficult, seek medical attention.
After skin contact	In case of contact with skin, wash carefully with plenty of soap and water. Consult a doctor in case of skin reactions.
After eye contact	Rinse the eyes with open eyelids for a sufficiently long time (a least 10 minutes) with water that is as lukewarm as possible Consult an ophthalmologist.
After swallowing	Do NOT induce vomiting. Rinse mouth with water. Medica attention required.
4.2 Most important sympt and effects, both acute and	
delayed	Advice for the doctor: Elementary aid, decontamination

symptomatic treatment. • **4.3 Indication of any** immediate medical attention and special treatment needed Therapeutic measures: No information available.

SECTION 5: Firefighting measures

• Protective equipment:

 5.1 Extinguishing media Suitable extinguishing agents 	s CO2, extinguishing powder or water jet. Fight larger fires with water jet or alcohol-resistant foam.
 5.2 Special hazards arising from the substance or 	
<i>mixture</i> · 5.3 Advice for firefighters	No further relevant information available.

No special measures required.

SECTION 6: Accidental release measures

 6.1 Personal precautions, protective equipment and 	
emergency procedures 6.2 Environmental	Not required.
precautions:	Inform respective authorities in case product reaches water or sewage system.
[•] 6.3 Methods and material for	
containment and cleaning up	a: Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Ensure adequate ventilation.
· 6.4 Reference to other	
sections	See Section 7 for information on safe handling

SECTION 7: Handling and storage

• 7.1 Precautions for safe	
handling	Ensure sufficient air exchange and/or extraction in the work areas. Air extraction is required for spray application. For solid products: Avoid dust formation and dust deposits. Air limit values mentioned in section 8 must be monitored. At workplaces where isocyanate aerosols and/or vapours can occur in higher concentrations, targeted air extraction must be used to prevent the occupational hygiene limit value from being exceeded. The air must be moved away from people. For products containing solvents: Explosion protection required. The personal protective measures described in section 8 must be observed. The protective measures required when handling isocyanates must be observed. Avoid contact with skin and eyes and inhalation of vapours. Keep away from food and beverages. Wash hands before breaks and at the end of work and apply skin protection ointment. Store work clothes separately. Remove soiled, soaked clothing immediately.
 Information about protection against explosions and fires: 	Keep ignition sources away - do not smoke. Protect from heat. Do not store near heat sources.
 7.2 Conditions for safe storage, including any incompatibilities Storage Requirements to be met by storerooms and containers: 	Keep container dry and tightly closed. Further information on the storage conditions that must be observed for quality assurance reasons can be found in our technical data sheet. Keep tightly closed in original packaging. Ventilate storage rooms well. Carefully close opened containers and store upright to prevent any leakage.
 Information about storage in one common storage facility: 	Storage temperature >5°C and <30°C May be stored together with hazardous substances of other classes up to 200 kg.
 Further information about storage conditions: Storage class 7.3 Specific end use(s) 	Keep container tightly closed in a well-ventilated place. 10 No further relevant information available.
