SECTION 3: Composition/information on ingredients

Identification number(s): void 3.2 Mixtures Description: Mixture consis		Polyalkohol-Emulsion in Wasser void Mixture consisting of the following components.	
· Dangerous comp	onents:		
CAS: 64742-95-6		ntha (petroleum), light arom. H226; Asp. Tox. 1, H304; Aquatic Chronic 2, H411; H335-H336, EUH066	≥0.25-<1.5%
CAS: 78330-21-9	Fatty alcohol polyglycol ether Eye Dam. 1, H318; Aquatic Chronic 3, H412		≥1-<1.5%
CAS: 8000-41-7	Terpineol Skin Irrit. 2, I	H315; Eye Irrit. 2, H319	<1.5%

SECTION 4: First aid measures

 4.1 Description of first aid 	
· General information	Remove, decontaminate and dispose of soiled, soaked clothing and shoes immediately.
· After inhalation	Remove person to fresh air, keep warm, allow to rest; if breathing is difficult, seek medical attention.
· After skin contact	In case of contact with skin, preferably wash with polyethylene glycol-based cleaner or clean with plenty of warm water and soap. Consult a doctor in case of skin reactions.
· After eye contact	Rinse the eyes with open eyelids for a sufficiently long time (at least 10 minutes) with water that is as lukewarm as possible. Consult an ophthalmologist.
	(Contd. on page 3)

Page 3/11

Revision: 08.12.2024

Trade name MC-DUR 2500 - Komponente A

 After swallowing 4.2 Most important symptor and effects, both acute and 	
delayed	Information for the doctor: The product irritates the respiratory tract and is a potential trigger for skin and respiratory sensitisation. Treatment of acute irritation or bronchial constriction is primarily symptomatic. Depending on the extent of exposure and the symptoms, prolonged medical treatment may be necessary.
 4.3 Indication of any immediate medical attention and special treatment need 	n
SECTION 5: Firefightin	g measures
 5.1 Extinguishing media Suitable extinguishing ager 	nts Use fire fighting measures that suit the environment. CO2, extinguishing powder or water jet. Fight larger fire with alcohol-resistant foam.
 5.2 Special hazards arising from the substance or 	

ance or No further relevant information available.

· 5.3 Advice for firefighters

mixture

· Protective equipment:

No special measures required.

SECTION 6: Accidental release measures

- 6.1 Personal precautions, protective equipment and emergency procedures Wear protective clothing.
 6.2 Environmental precautions: No special measures required.
 6.3 Methods and material for containment and cleaning up: Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
- 6.4 Reference to other sections

No dangerous materials are released.

SECTION 7: Handling and storage

 7.1 Precautions for safe handling

Ensure sufficient air exchange and/or extraction in the work areas. Air extraction is required for spray application. For solid products: Avoid dust formation and dust deposits. Air limit values mentioned in section 8 must be monitored. At workplaces where isocyanate aerosols and/or vapours can occur in higher concentrations, targeted air extraction must be (Contd. on page 4)

Page 4/11

Revision: 08.12.2024

Trade name MC-DUR 2500 - Komponente A

	Contd. of page (Contd. of page) used to prevent the occupational hygiene limit value from bein
	exceeded. The air must be moved away from people.
	For products containing solvents: Explosion protection required. The personal protective measures described in section 8 must b
	observed. The protective measures required when handlin isocyanates must be observed. Avoid contact with skin and eye and inhalation of vapours.
	Keep away from food and beverages. Wash hands before break and at the end of work and apply skin protection ointment. Stor work clothes separately. Remove soiled, soaked clothin immediately.
7.2 Conditions for safe	
storage, including any incompatibilities	Keep container dry and tightly closed. Further information on th storage conditions that must be observed for quality assuranc reasons can be found in our technical data sheet.
[·] Storage	
Requirements to be met by	
storerooms and containers: • Further information about	Store only in the original container.
storage conditions:	None.
Storage class	10
 7.3 Specific end use(s) 	No further relevant information available.

SECTION 8: Exposure controls/personal protection

 8.1 Control parameters Components with critical values that require 	
monitoring at the workplace:	The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.
· Additional information:	The lists that were valid during the compilation were used as basis.
 8.2 Exposure controls Appropriate engineering 	
controls	No further data; see section 7.
· Individual protection measure	es, such as personal protective equipment
General protective and	
hygienic measures	Keep away from food, drink and animal feed. Remove soiled, soaked clothing immediately. Wash hands before breaks and at the end of work. Avoid contact with eyes and skin.
· Breathing equipment:	Respiratory protection required at insufficiently ventilated workplaces and when working with splashes. Fresh air masks or combination filters A2-P2 (EN529) are recommended for short- term work.
	If applicable, further recommendations for respiratory protection can be found in the appendix.
	In case of hypersensitivity of the respiratory tract (asthma, chronic (Contd. on page 5)

Page 5/11

Safety data sheet according to Regulation (EC) No 1907/2006, Article 31

Printing date 10.12.2024

Version number 32 (replaces version 31)

Revision: 08.12.2024

Trade name MC-DUR 2500 - Komponente A

	(Contd. of page 4) bronchitis), handling of the product is not recommended.
· Hand protection	Suitable materials for protective gloves; EN 374:
nand protection	Butyl rubber, nitrile rubber, chloroprene rubber (neoprene).
	Note: suitable materials that provide sufficient protection for
	industrial cleaning with aprotic polar solvents (according to IUPAC
	definition): butyl rubber.
	In case of prolonged or frequently repeated contact, a glove with a
	protection class of 5 or higher is recommended (breakthrough time
	greater than 240 minutes according to EN374). For short-term
	contact, a glove with a protection class of 3 or higher is
	recommended (breakthrough time greater than 60 minutes
	according to EN374).
	The thickness of the material is not the only criterion for the level of
	protection of a glove against a chemical substance. The protective
	effect also depends to a large extent on the type of glove material.
	Depending on the type and material, the thickness must be more
	than 0.35 mm to ensure adequate protection in the event of
	prolonged and frequent contact. Exceptions to this rule are multi-
	layer gloves, which guarantee sufficient protection even with a
	thickness of less than 0.35 mm during prolonged wear. Other glove
	materials with a thickness of less than 0.35 mm only provide
	sufficient protection for short periods of wear.
	For solvent-free products:
	Example:
	<i>Polychloroprene - CR: thickness ≥0.5mm; breakthrough time ≥480min.</i>
	Nitrile rubber - NBR: thickness ≥0.35mm; breakthrough time ≥480min.
	Butyl rubber - IIR: thickness ≥0.5mm; breakthrough time ≥480min.
	Fluoro rubber - FKM: thickness ≥0.4mm; breakthrough time ≥480min.
	Recommendation: Dispose of contaminated gloves.
• Material of gloves	Polychloroprene - CR
5	Nitrile rubber - NBR
	Butyl rubber - IIR
	Fluoro rubber - FKM
 Penetration time of glove 	
material	Polychloroprene - CR: thickness ≥0.5mm; breakthrough time
	≥480min.
	Nitrile rubber - NBR: thickness ≥0.35mm; breakthrough time
	≥480min.
	Butyl rubber - IIR: thickness ≥0.5mm; breakthrough time ≥480min.
	Fluoro rubber - FKM: Thickness 20.4mm; Breakthrough time 2480min.
· Eye/face protection	Safety goggles with side protection in accordance with EN 166.
· Body protection:	Use chemical-resistant protective clothing.
	In case of hypersensitivity of the skin, handling the product is not recommended.
