# Safety data sheet

according to Regulation (EC) No 1907/2006, Article 31

Printing date 15.04.2025

Version number 34 (replaces version 33)

Revision: 15.04.2025

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

· 1.1 Product identifier	
<ul> <li>Trade name</li> <li>CAS Number:</li> <li>Index number:</li> <li>1.2 Relevant identified uses of the substance or mixture</li> </ul>	<u>MC-Injekt 2700 - Komponente B</u> 9016-87-9 615-005-01-6
and uses advised against Application of the substance / the mixture	No further relevant information available. Injektion Polyurethane resin Hardening agent/ Curing agent
• 1.3 Details of the supplier of t • Manufacturer/Supplier:	he safety data sheet MC-Bauchemie Müller GmbH & Co. KG Am Kruppwald 1-8 D-46238 Bottrop Tel.: +49(0)2041-101-0 Fax.: +49(0)2041-101-400 E-Mail: info@mc-bauchemie.de MC-Bauchemie AG Hagackerstr. 10 CH-8953 Dietikon Tel.: +44-7400510 Fax : +44-7400533
<ul> <li>Informing department:</li> <li>1.4 Emergency telephone number:</li> </ul>	msds@mc-bauchemie.de Tel.: +49 /  (0)700 24112112 (MCR) Tel.: +1 872 5888271 (MCR)

### **SECTION 2: Hazards identification**

### · 2.1 Classification of the substance or mixture

· Classification according to Regulation (EC) No 1272/2008

Skin Irrit. 2 H315 Causes skin irritation.

- *Eye Irrit.* 2 H319 Causes serious eye irritation.
- Resp. Sens. 1 H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.
- Skin Sens. 1 H317 May cause an allergic skin reaction.
- Carc. 2 H351 Suspected of causing cancer.
- STOT SE 3 H335 May cause respiratory irritation.

STOT RE 2 H373 May cause damage to organs through prolonged or repeated exposure.

### · 2.2 Label elements

· Labelling according to

**Regulation (EC) No 1272/2008** The substance is classified and labelled according to the CLP regulation.

(Contd. on page 2)

<sup>·)</sup> 

Page 2/11

### Trade name MC-Injekt 2700 - Komponente B

(Contd. of page 2)

### **SECTION 4: First aid measures**

· 4.1 Description of first aid measures

· General information	Remove, decontaminate and dispose of soiled, soaked clothing and shoes immediately.
· After inhalation	Remove person to fresh air, keep warm, allow to rest; if breathing is difficult, seek medical attention.
· After skin contact	In case of contact with skin, preferably wash with polyethylene glycol-based cleaner or clean with plenty of warm water and soap. Consult a doctor in case of skin reactions.
· After eye contact	Rinse the eyes with open eyelids for a sufficiently long time (at least 10 minutes) with water that is as lukewarm as possible. Consult an ophthalmologist.
· After swallowing	Do NOT induce vomiting. Rinse mouth with water. Medical attention required.
<ul> <li>4.2 Most important symptoms and effects, both acute and</li> </ul>	;
delayed	Information for the doctor: The product irritates the respiratory tract and is a potential trigger for skin and respiratory sensitisation. Treatment of acute irritation or bronchial constriction is primarily symptomatic. Depending on the extent of exposure and the symptoms, prolonged medical treatment may be necessary.
<ul> <li>4.3 Indication of any immediate medical attention</li> </ul>	

SECTION 5: Firefighting measures

and special treatment needed No information available.

· 5.1 Extinguishing media

- Suitable extinguishing agents Use fire fighting measures that suit the environment.
- 5.2 Special hazards arising from the substance or mixture

Can be released in case of fire Carbon monoxide (CO) Nitrogen oxides (NOx) Hydrogen cyanide (HCN) Under certain fire conditions, traces of other toxic gases cannot be excluded.

5.3 Advice for firefighters
 Protective equipment:

Put on breathing apparatus.

### **SECTION 6: Accidental release measures**

 6.1 Personal precautions, protective equipment and emergency procedures

Keep people at a distance and stay on the windward side. Put on breathing apparatus.

<ul> <li>6.2 Environmental precautions:</li> </ul>	Prevent material from reaching sewage system, holes and cellars.
6.3 Methods and material for	
containment and cleaning up:	Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
	Dispose of contaminated material as waste according to item 13. Ensure adequate ventilation.
<sup>•</sup> 6.4 Reference to other	
sections	See Section 7 for information on safe handling
	See Section 8 for information on personal protection equipment.
	See Section 13 for information on disposal.

## **SECTION 7: Handling and storage**

•	7.1 Precautions	for	safe
	handling		

handling	Ensure sufficient air exchange and/or extraction in the work areas. Air extraction is required for spray application. For solid products: Avoid dust formation and dust deposits. Air limit values mentioned in section 8 must be monitored. At workplaces where isocyanate aerosols and/or vapours can occur in higher concentrations, targeted air extraction must be used to prevent the occupational hygiene limit value from being exceeded. The air must be moved away from people. For products containing solvents: Explosion protection required. The personal protective measures described in section 8 must be observed. The protective measures required when handling isocyanates must be observed. Avoid contact with skin and eyes and inhalation of vapours. Keep away from food and beverages. Wash hands before breaks and at the end of work and apply skin protection ointment. Store work clothes separately. Remove soiled, soaked clothing immediately.
• 7.2 Conditions for safe storage, including any incompatibilities	Keep container dry and tightly closed. Further information on the storage conditions that must be observed for quality assurance reasons can be found in our technical data sheet.
<ul> <li>Storage</li> <li>Requirements to be met by storerooms and containers:</li> <li>Further information about storage conditions:</li> <li>Storage class</li> <li>7.3 Specific end use(s)</li> </ul>	Store only in the original container. None. 10 No further relevant information available.

## Safety data sheet according to Regulation (EC) No 1907/2006, Article 31

Printing date 15.04.2025

Version number 34 (replaces version 33)

Revision: 15.04.2025

### Trade name MC-Injekt 2700 - Komponente B

	(Contd. of page 5) The thickness of the material is not the only criterion for the level of protection of a glove against a chemical substance. The protective effect also depends to a large extent on the type of glove material. Depending on the type and material, the thickness must be more than 0.35 mm to ensure adequate protection in the event of prolonged and frequent contact. Exceptions to this rule are multi- layer gloves, which guarantee sufficient protection even with a thickness of less than 0.35 mm during prolonged wear. Other glove materials with a thickness of less than 0.35 mm only provide sufficient protection for short periods of wear. For solvent-free products: Example: Polychloroprene - CR: thickness ≥0.5mm; breakthrough time ≥480min. Nitrile rubber - NBR: thickness ≥0.35mm; breakthrough time ≥480min. Butyl rubber - IIR: thickness ≥0.5mm; breakthrough time ≥480min. Fluoro rubber - FKM: thickness ≥0.4mm; breakthrough time
• Material of gloves	Recommendation: Dispose of contaminated gloves. Polychloroprene - CR Nitrile rubber - NBR Butyl rubber - IIR Fluoro rubber - FKM
· Penetration time of glove	
material	Polychloroprene - CR: thickness ≥0.5mm; breakthrough time ≥480min.
	Nitrile rubber - NBR: thickness ≥0.35mm; breakthrough time ≥480min.
	Butyl rubber - IIR: thickness ≥0.5mm; breakthrough time ≥480min. Fluoro rubber - FKM: Thickness ≥0.4mm; Breakthrough time ≥480min.
· Eye/face protection	Safety goggles with side protection in accordance with EN 166.
· Body protection:	Use chemical-resistant protective clothing. In case of hypersensitivity of the skin, handling the product is not recommended.

# SECTION 9: Physical and chemical properties 9.1 Information on basic physical and chemical properties General Information Colour: Dark brown Smell: Characteristic Melting point/freezing point: Not determined Boiling range 330 °C Flash point: 204 °C
